

CARPORT PV MOUNTING SYSTEM

Provide customized design and production processing for solar carport

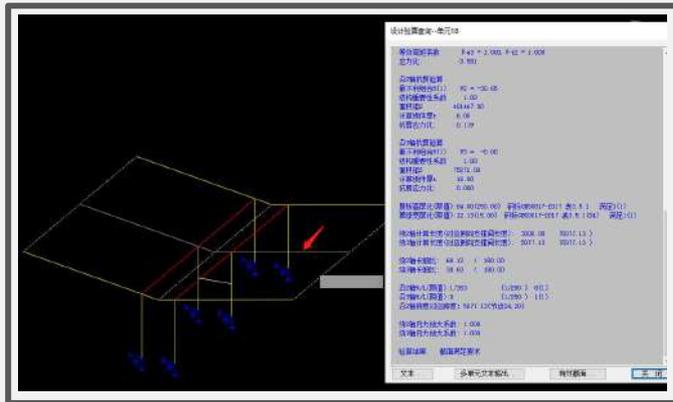

According to the project requirements, provide customized solar carport design plan,

service business covers Europe;

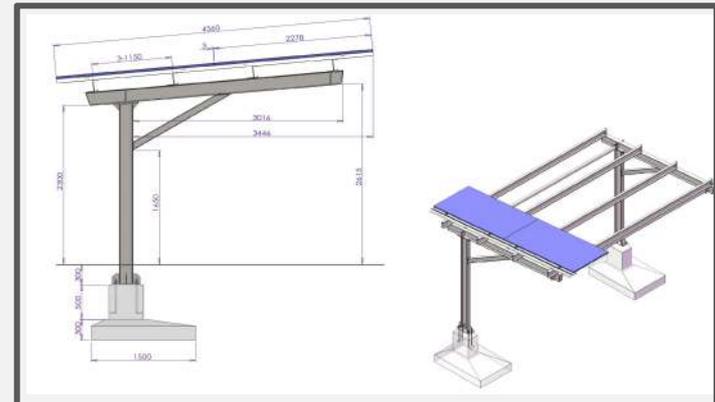

Design standard reference: BSEN1991;

Provide design drawings, packaging plans, strength calculations, installation instructions, etc

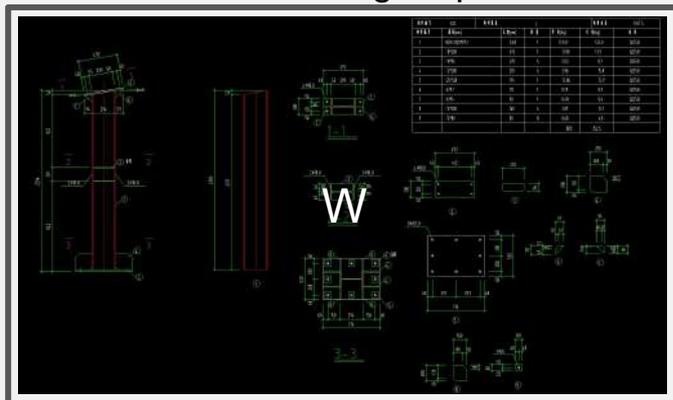

Finite Element Analysis

Installation Instructions

Professional Production of Aluminum Solar Carport

E-Port H A1

N-Type Aluminum Solar Carport

Material: Aluminum 6005-T5,

Spacing: 5m-6m

Angle: 3-20 °

Surface treatment: oxidation/flame painting

Foundation: steel pile/concrete

E-Port H A2

N-Type Aluminum Solar Carport

Material: Aluminum 6005-T5,

Spacing: 5m-6m

Angle: 3-20 °

Surface treatment: oxidation/flame painting

Foundation: steel pile/concrete

E-Port H A3

Double Legged Aluminum Solar Carport

Material: Aluminum 6005-T5,

Spacing: 5m-6m

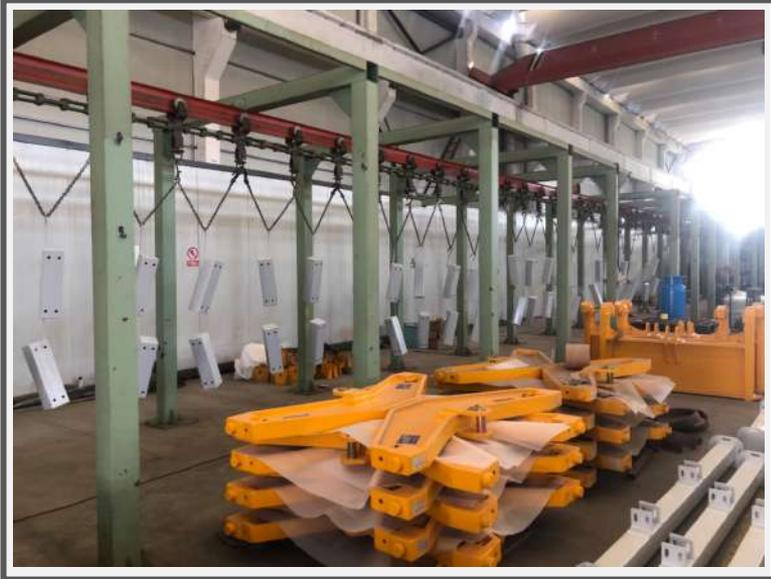

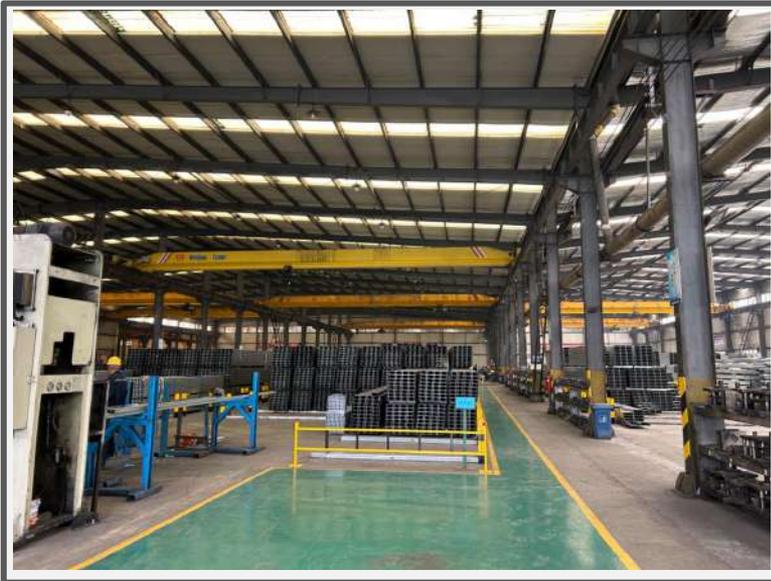

Angle: 3-10 °

Surface treatment: oxidation/flame painting

Foundation: concrete

Professional Production of Steel Solar Carport

E-Port H S1

Single Leg Steel Solar Carport

Material: Q235B/Q355B

Spacing: 5m-6m

Angle: 3-15 °

Surface treatment: HDG/spray painting

Foundation: concrete

E-Port H S2

Single Leg Steel Solar Carport

Material: Q235B/Q355B

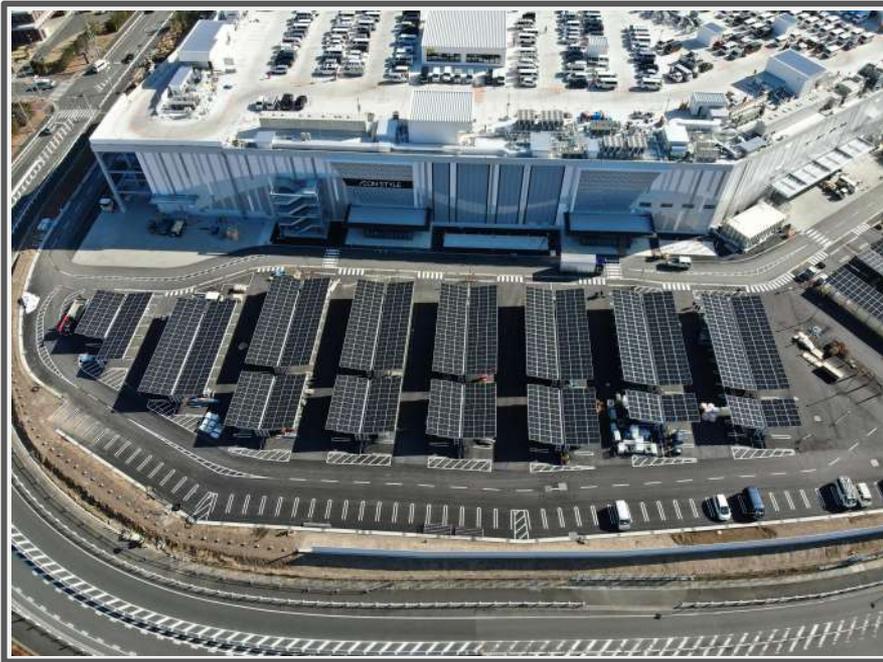

Spacing: 5m-6m

Angle: 3-15 °

Surface treatment: HDG/spray painting

Foundation: concrete

E-Port H S3

Single Leg Steel Solar Carport

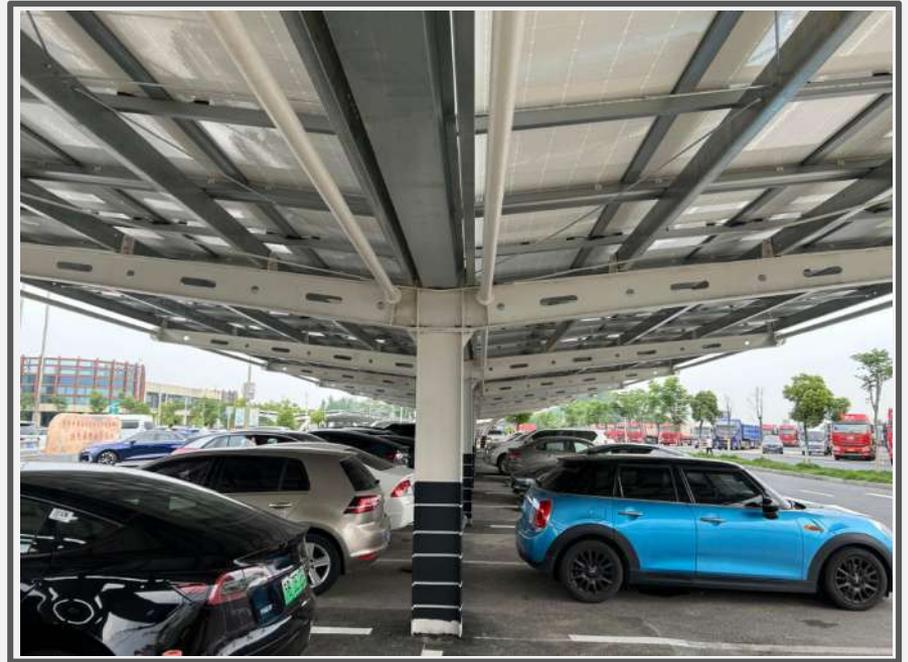

Material: Q235B/Q355B

Spacing: 2.5m-3m

Angle: 3-10 °

Surface treatment: HDG /spray painting

Foundation: concrete

E-Port H S4

Single Leg Steel Solar Carport

Spacing: 5m-6m

Angle: 3-15 °

Surface treatment: HDG/spray painting

Foundation: concrete

E-Port H S5

Single Leg Steel Solar Carport

Material: Q235B/Q355B

Spacing: 5m-6m

Angle: 3-15 °

Surface treatment: HDG/spray painting

Foundation: concrete

E-Port H S6

Double Legged Steel Solar Carport

Material: Q235B/Q355B

Spacing: 5m-6m

Angle: 3 -15 °

Surface treatment: HDG/spray painting

Foundation: concrete
